3D FILM BOOSTER 2017

Call for projects

Submission deadline: 15 September 2017

Calling for stereoscopic-3D projects for Cinema and VR!

The 3D Film Booster (3DFB) is one of the main components of the **Stereopsia** event. Now in its 2nd edition, **3DFB** is an **international training and pitching event dedicated to stereoscopic-3D projects for Cinema and Virtual reality (VR)**. It is the only program of its kind anywhere in the world.

3DFB will take place on **10-13 Dec 2017** at the Centre of Fine Arts (BOZAR) in Brussels, Belgium, as part of **Stereopsia**, the World Immersion Forum (www.stereopsia.com).

3DFB is organized in collaboration with Sylvain Grain, one of the most active European specialist of stereoscopic-3D cinema and award-winning producer of several large format 3D documentaries.

We are looking for **independent producers with a project in development for a 3D film (theatrical release) or a 3D VR film (for virtual reality devices/platforms)**. The projects must have, at a minimum, a first-cut preliminary script (or a complete treatment), a significant international sales potential, and - for 3D films only - a duration of at least 40 minutes. The projects can be submitted by experienced S-3D producers, experienced 2D producers willing to make the transition to S-3D, or persons with a demonstrated artistic ability. **For details, please consult the 3DFB regulations.**

3DFB is a 3-days program starting with an intensive, small-group, hands-on training led by international experts to master the **art of pitching**, get the **latest insights & trends for the 3D film industry and market**, be at the forefront of the **VR revolution** and open your horizon to **transmedia storytelling**. Each participant will pitch his/her project in front of a jury of international financiers and co-producers and will compete for the "**Best project and pitch award**", which will be given to the winner during the **Awards Dinner** of Stereopsia held on 13 Dec 2017 at the prestigious BOZAR.

3DFB also features a series of networking events and promotional opportunities to offer a real impulse to the selected projects and their producers.

There is no fee for submitting a project. However, if a project is selected, the producer of this project must register for the appropriate pass, and pay the corresponding registration fee, in accordance with the **3DFB** regulations.

In the best interest of all those attending the **3DFB**, the selected producers are required to attend it from its opening on 10 December until its closing on 13 December. Furthermore, the above award will be forfeited if its producer is not present in person during the Awards ceremony. Full attendance and participation to the booster is paramount.

All information about **3DFB** can be found at www.stereopsia.com/booster including this Call for projects, the Regulations, and the Submission form. Although the Regulations provide answers to most of the questions you may have, do not hesitate to contact us if you still have questions.

The Submission form and all required elements must be sent by email (see below) no later than **15 September 2017**.
