

**Stereopsia, the World Immersion Forum**, offers you the unique possibility of **adopting & sponsoring** the following thematic conference, to be attended by world experts, & to be held in Brussels, Belgium, on **6 Dec 2018**.

## THEMATIC CONFERENCE ON Emerging XR Tech & Apps

XR technologies - both hardware & software - are evolving fast, and it is a challenge for anyone to know their exact state on any particular day. The same is true for the numerous applications of XR in a variety of sectors.

This Thematic conference will bring you up to date on some of the emerging XR technologies and applications. Examples thereof are standards, compression techniques, interfaces (like OpenVR), omnidirectional (3D) cameras, stitching techniques & services, wide field-of-view headsets, input devices, volumetric imaging (allowing one to record a scene from the its periphery rather than from a central point), social XR, and simulated formula-1 races.

### ADOPT A CONFERENCE:

YOUR BENEFIT	YOUR COST	YOUR CONTACT
<ul style="list-style-type: none"><li>- Visibility on the website, in the newsletters, and on site;</li><li>- 1 speaking opportunity;</li><li>- 50 one-day passes;</li><li>- 50% discount on a booth in the exhibition area.</li></ul>	<ul style="list-style-type: none"><li>- <b>5,000 Euros</b> + applicable taxes</li><li>- Only one adopter per conference</li><li>- Conference lasts 1.5-2.0 hours.</li></ul>	<p>ALAIN GALLEZ alain@stereopsia.com +32 4 229 27 52</p>
