

Stereopsia, the World Immersion Forum, offers you the unique possibility of **adopting & sponsoring** the following thematic conference, to be attended by world experts, & to be held in Brussels, Belgium, on 6 or 7 Dec 2018.

Thematic conference on **XR & Artificial Intelligence**

Boosted by newly-available software tools, artificial intelligence (AI) is enjoying a re-gain of popularity in many fields, and, for the first time since its inception over 50 years ago, AI is now affecting the entertainment industry, and the impact will be strong & long-lasting, especially for XR applications.

This conference shows you that the much touted-about AI is not a silver bullet, but an à-la-mode, catch-all term for advanced computer-science and engineering techniques such as computer vision, natural language understanding, machine learning, & deep learning. The conference shows you how AI allows old movies to be brought-up to full HD; stories, video sequences, & sound tracks to be generated automatically; and storytelling to be stretchy, nonlinear, and emotion guided.

ADOPT A CONFERENCE:

YOUR BENEFIT	YOUR COST	YOUR CONTACT
<ul style="list-style-type: none">- Visibility on the website, in the newsletters, and on site;- 1 speaking opportunity;- 50 one-day passes;- 50% discount on a booth in the exhibition area.	<ul style="list-style-type: none">- 5,000 Euros + applicable taxes- Only one adopter per conference- Conference lasts 1.5-2.0 hours.	<p>ALAIN GALLEZ alain@stereopsia.com +32 4 229 27 52</p>
