

## XR FOR HEALTHCARE

The development and use of immersive/XR technologies in healthcare is growing fast throughout the world. With the domain still in its infancy, the potential for creating innovative contents & apps is boundless, and the domain is thus ripe for innovative R&D and lucrative business, especially for start-ups.

This Thematic conference opens up your eyes by presenting a variety of XR techniques that are in use, in development, or just concepts, such as for: training surgeons, obstetricians, emergency physicians; drilling rescue & emergency responders; treating phobias for spiders & heights, addictions, & other psychological issues; producing hypnosis; reassuring children undergoing heavy medical procedures & helping them lower their anxieties by VR-based biofeedback.

### YOUR BENEFIT

- Visibility on the website, in the newsletters, and on site;
- 1 speaking opportunity;
- 50 one-day passes;
- 50% discount on a booth in the exhibition area.

### YOUR COST

- **5,000 Euros** + applicable taxes
- Only one adopter per conference
- Conference lasts 1.5-2.0 hours.
